

Your kitchen, one connected path.

A real camera workflow with labelled products, checkpoints, and shelf positions.

1. Mark one real corridor in this order.

Place labels along the accessible passage. No alternate path is assumed.

Schematic only. WEST / EAST are marker names, not compass directions.

Rack A: first dry storage zone. Rack B: second dry storage zone.

A blocked corridor means stop and inspect; there is no invented detour.

2. Cut and attach the labels.

Page 2: four product labels (both QR and Code 128).

Page 3: four distinct shelf / tray positions in two dry storage zones.

Page 4: West, East, Rack A, and Rack B checkpoints.

Cut out the RECEIVING checkpoint below.

3. Scan a batch, approve on laptop.

Phone: start batch, scan each barcode once.

Duplicate barcode? Red error; not added.

Finish batch > review / approve on laptop.

Begin put-away > scan checkpoints.

Scan shelf + product > place > confirm.

MAP DOES NOT MATCH YOUR KITCHEN?

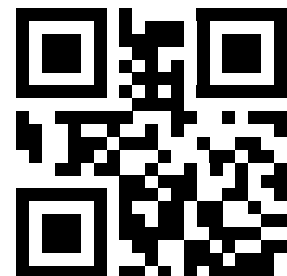

Edit nodes/edges in warehouse.json and restart.

Never assume a drawn path exists in your room.

Camera observations are advisory, not safety certification.

RECEIVING

Start / receiving table

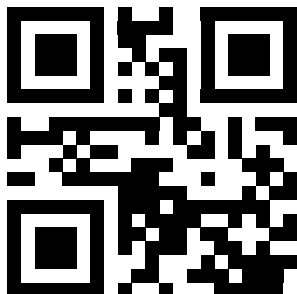

OWN:RECEIVING

Batch scan. Laptop approval.

Attach each label to the matching product or a clearly labelled demo prop.

Rice

DRY / Product ID

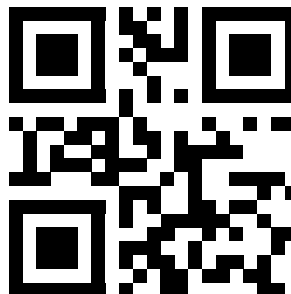

OWP-RICE

QR and barcode encode the same product ID.

Oats

DRY / Product ID

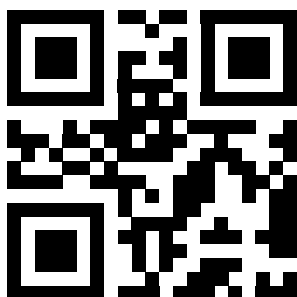

OWP-OATS

QR and barcode encode the same product ID.

Tea

BEVERAGE / Product ID

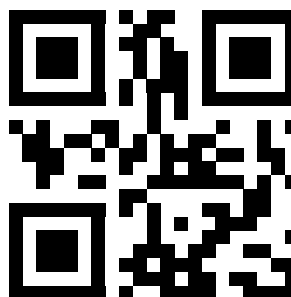

OWP-TEA

QR and barcode encode the same product ID.

Canned beans

CANNED / Product ID

OWP-BEANS

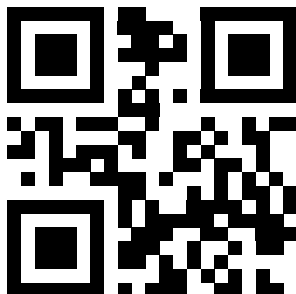

QR and barcode encode the same product ID.

Every shelf has an identity.

Scan the assigned shelf, rescan the product, then confirm physical placement.

A-R1-S1

Aisle A / Rack 1 / Shelf 1

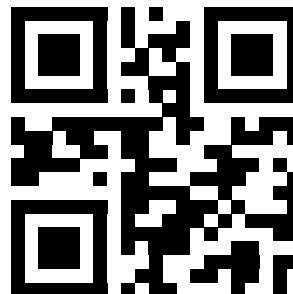

OWL:A-R1-S1

Attach to this exact physical location.
Scan one label at a time.

A-R1-S2

Aisle A / Rack 1 / Shelf 2

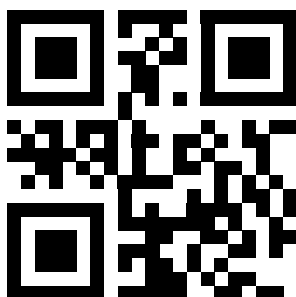

OWL:A-R1-S2

Attach to this exact physical location.
Scan one label at a time.

B-R1-S1

Aisle B / Rack 1 / Shelf 1

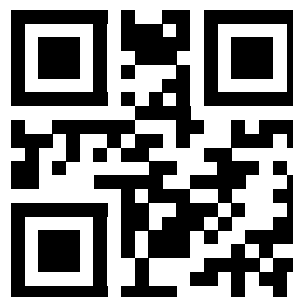

OWL:B-R1-S1

Attach to this exact physical location.
Scan one label at a time.

B-R1-S2

Aisle B / Rack 1 / Shelf 2

OWL:B-R1-S2

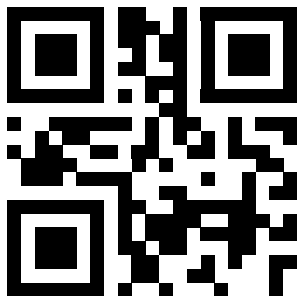

Attach to this exact physical location.
Scan one label at a time.

Know where the next move begins.

Scan at each checkpoint. RECEIVING is on page 1. These are location IDs, not GPS.

WEST

West checkpoint

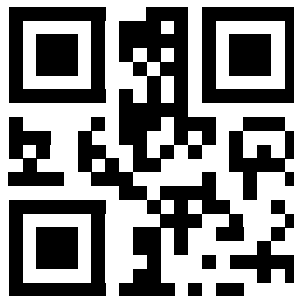

OWN:WEST

Attach to this exact physical location.
Scan one label at a time.

EAST

East checkpoint

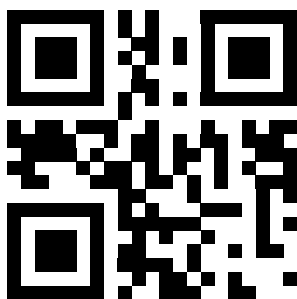

OWN:EAST

Attach to this exact physical location.
Scan one label at a time.

RACK A

Rack A

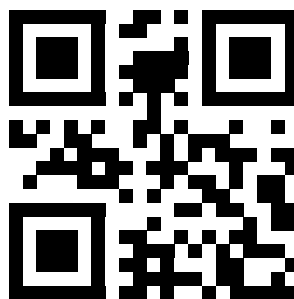

OWN:RACK_A

Attach to this exact physical location.
Scan one label at a time.

RACK B

Rack B

OWN:RACK_B

Attach to this exact physical location.
Scan one label at a time.
